

# RPB® T200™ Respirator

## Move naturally.

The RPB T200 enables you to experience true freedom of movement in your environment while relieving you of the breathing difficulties and fatigue that can be encountered with N95 use. Designed for function, comfort, and durability, the T200 ensures your protection so you can focus on what really matters.

Made for customization, the T200 features multiple adjustment points on the head harness, allowing users to change the fitting to suit the contours and shape of their head. Through the secure fit and streamlined framework, this maximizes stability, relieving the user of aches and strains on their neck.

With the large visor, users can experience an uncompromised field of view, connecting them closer to their surroundings. The T200 also features adjustable lens and air ducting positioning to accommodate for different facial features and the use of optical aids such as loupes.

Get more out of your role by using respiratory protection that supports, not restricts you. Experience more with the RPB T200.

### The T200 offers the user superior protection in all key areas:

## Features & Benefits

Three DuPont™ Tychem® 2000 hood options available - short over ear and medium (for use with stethoscopes) and full length hood. Full length hood also available in DuPont™ Tychem® 4000.

Tychem® breathing tube cover available to increase the life and cleanability of the breathing tube.

Moveable lens and airduct positioning to accommodate for facial features, optical aids and loupes.

Large viewing window for exceptional downward and peripheral vision allowing for both verbal and non-verbal communication. Optional peel-off lenses are available to protect visor lens and to quickly clear your field of view.

All parts can be purchased individually for easy maintenance and servicing.

Soft cotton inner neck seal for extra comfort.

Deconable head suspension system and disposable hood.

Breathing tube easily attaches to respirator and swivels to eliminate tangles. Centralized location ensures even weight distribution.

Over ear hood design allows for the use of stethoscopes.

Customizable head suspension system includes an adjustable ratchet at the back and over-the-head straps to allow for a secure, individualised fit.

Shown without cape for visual purposes only >>
