

TIVA

High end washers for the decontamination
of complex instruments

The TIVA Washer Disinfector Line

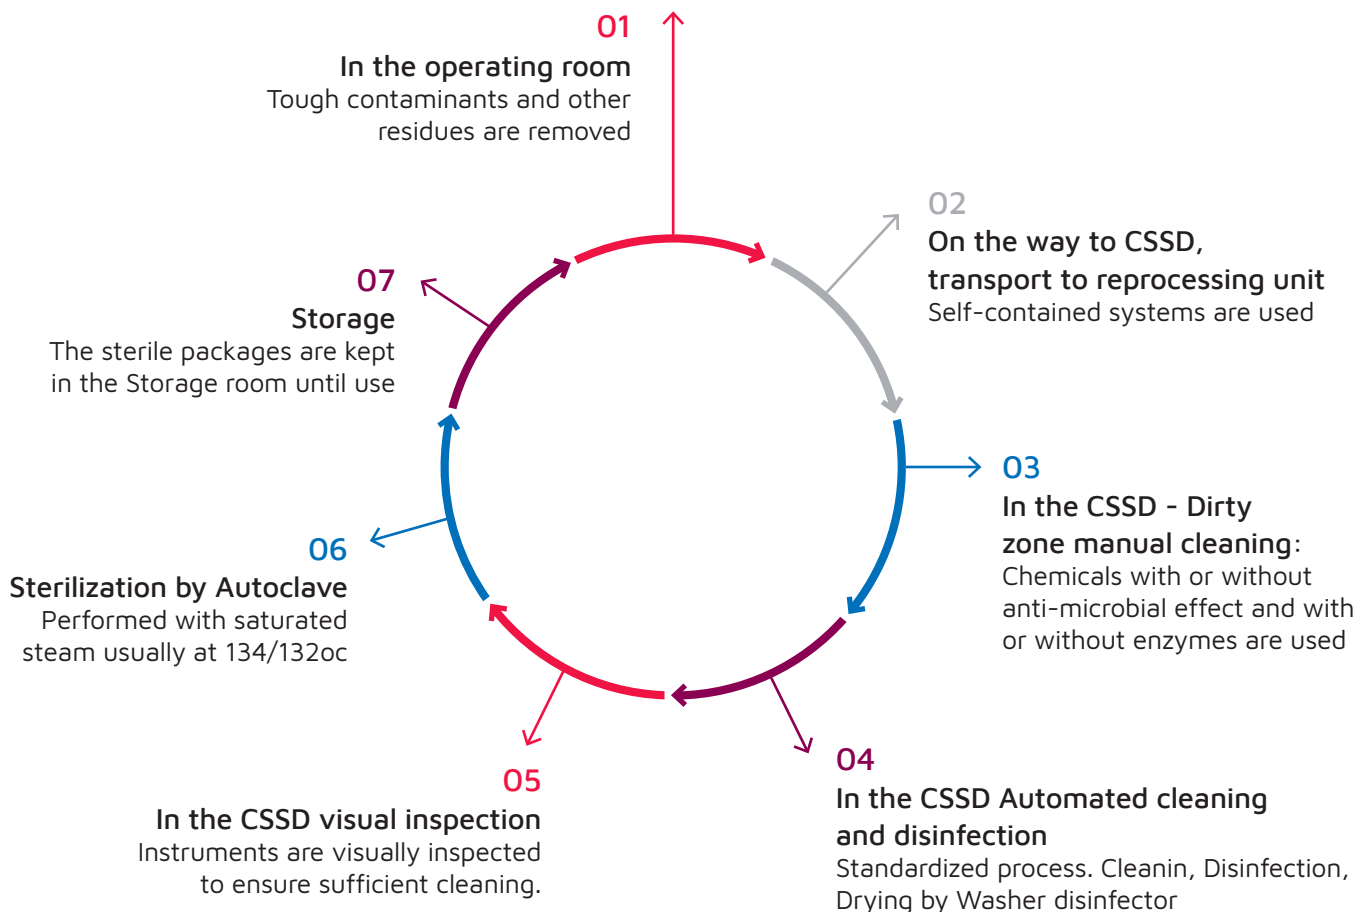

Surgeries are at the heart of the hospital. The timely delivery of sterile goods is crucial for hospital operation. Surgical instruments must go through strict and standardized cleaning, disinfection and sterilization processes before they can be reused. Keeping up with the high demand from the OR, providing quick instrument turnaround while ensuring patients' safety requires advanced solutions. The Tuttnauer Tiva washer-disinfectors meets these challenges by simplifying staff's mission and reducing processing time and costs.

The Tiva line is a top performer that:

- Minimizes consumption and operation costs while maximizing sustainability
- Improves user experience with an advanced control system and an easy to use interface
- Uses the highest quality materials providing a safe and efficient process

Tiva washer disinfectors provide a flexible turnkey solution for washing, disinfecting and drying diverse medical instruments for a complete decontamination cycle.

Cleaning and disinfection process scheme example

Improved Productivity and Efficiency

- User Interface is designed to eliminate human error. A touchscreen control system provides an enhanced user experience. Operate the washer directly from a large color screen tracking every point of the process, the system parameters, charts and graphs. The validation of each cycle is easily viewed in a graphic display.
- Top Quality AISI 316L Stainless Steel chamber keeps the surgical instruments integrity, outlasting the harshest chemical substances. The frame is constructed from AISI 304 for extra resilience.
- Save Energy and Reduce Drying Time - A Steam Condenser treats excess water and steam in the chamber reducing energy consumption and drying time.
- Smart Load Type Recognition - Tiva identifies the trolley type and automatically recommends which programs to use according to load. This feature alone increases productivity and accuracy, saving energy and reducing human error.
- Tempered Glass Sliding Door for Visual Monitoring
- The washer-disinfector is designed to minimize floor space usage.

TIVA 8 UNDERCOUNTER MANUAL HINGED DOOR/S

UP TO 4 washing levels of total 8 DIN baskets capacity, 175 Liter chamber

The TIVA 8 washer is equipped with a manual hinged glass door and is best suited for clinics and dental practices. It can be loaded with up to 4 washing levels with a large variety of washing trolleys and accessories. Available trolleys for DIN baskets, containers, mini-invasive equipment, anesthesia kits, bottles, shoes and dental handpieces.

NTTIVA-8

Narrow Design

175 Liter chamber

Dimensions (WxDxH mm) 600x650x860

Selectable configurations:
Detergent storage cabinet /Pre-heating tank for reduction of cycle time + Detergent cabinet and demineralized water connection

NTTIVA-8-WD-1M / NTTIVA-8-HS-1M

Wide design

175 Liter Chamber

Dimensions (WxDxH mm) 900x650x860

Speed
Cycle

Features

- Manual glass door
- Washing chamber made of high quality AISI 316L
- Touch panel with color graphic display
- A total of 40 programs: Preset and programmable procedures
- Air drying prefilter + HEPA H14 filter
- Preheated tank for cycle time reduction (only for HS model)
- 2 dosing pumps with flowmeter for acid and alkaline detergents (2 additional pumps optional)
- 3 heating elements
- Integrated water softener
- USB/ Printer for data documentation
- Built-in steam condenser

Optional

- Conductivity measurements to check rinse water quality before disinfection phase
- Demi water boiler (only for HS version)
- Chamber LED light: Operates during loading, unloading and running the program
- Trolley load type recognition
- Spray arm continuous monitoring of piping to guarantee that the load is currently washed
- Stainless steel stand for ergonomic loading and unloading (not installed under-counter)
- Water connection: Cold water softener, purified water (TIVA 8-1M, TIVA 8-WD-1M)
Cold water softener (TIVA 8-HS-1M)
- Graphic report of washing phases including time and temperature
