

CaviWipes™ Bleach

If gross debris is present on the surface:

1. Pull out CaviWipes Bleach towellette, tearing at a 90° angle.

2. Use CaviWipes Bleach towelette(s) to completely pre-clean surface of all gross debris. Once surface is clean, dispose of used towelette in accordance with Federal, State, and local regulations for infectious materials disposal.

Disinfect after Cleaning

3. Pull out additional towelette.
4. Disinfect pre-cleaned surface with towelette. Leave surface wet for 3 minutes. Dispose of used towelette.

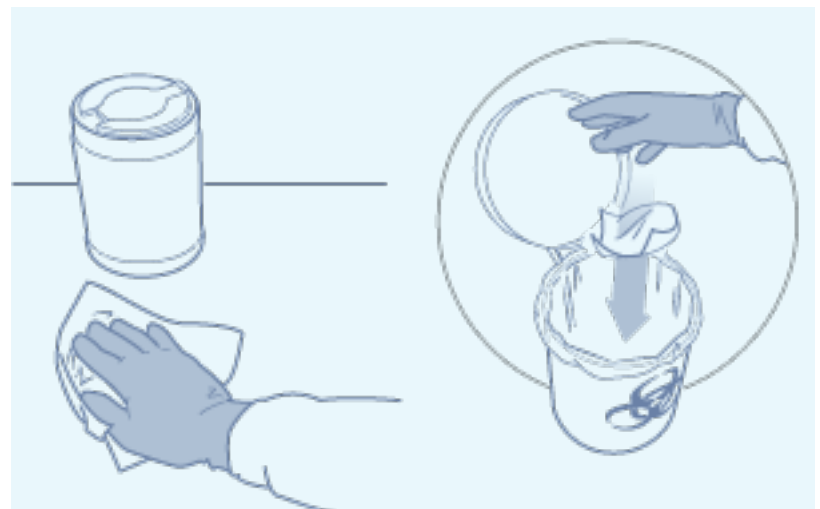

If NO gross debris is present on the surface:

1. Pull out CaviWipes Bleach towellette, tearing at a 90° angle.

2. Disinfect surface with towelette. Leave surface wet for 3 minutes. Dispose of used towelette in accordance with Federal, State, and local regulations for infectious materials disposal.
